Script-Controlled ACL

Restrict Record Access Based on Field Value

Phase 8 - Presentation & Final Submission

Purpose: Present the project clearly and prepare the final submission materials.

Section	Details
Project Presentation	Explain the problem, objectives, requirements, design, Script-Controlled ACL implementation, testing, and results.
Demonstration	Demonstrate record access based on a field value, showing how the script-controlled ACL evaluates the record and allows or restricts access according to the defined condition.
Submission Files	Organize phase PDFs, screenshots, documentation, ACL configuration details, scripts, testing evidence, and relevant project evidence in the GitHub repository.
Final Outcome	Submit the completed project with a clear repository structure and supporting documentation demonstrating that record access is controlled dynamically based on the specified field value.

Project Note: This phase document is prepared for organizing the TN Skills project evidence and can be supplemented with your actual screenshots, ACL configuration, script details, test cases, and results.
